

How to Download and Save an Image from Flickr

From your desktop

1. Select the image you want to save.
2. Select the **download icon**

3. A menu of sizes opens.

4. Select a size.

5. The “Save As” window opens. Navigate to the folder where you want the image saved. If you want to rename the image, you can type over the file name. Select **Save**.
6. The image is saved on your desktop in the folder.

From your iPhone

1. Select the image you want to save
2. Select the **share icon**

3. An options menu opens with a list of apps that can receive the photo. These may include Messages, Email, WhatsApp, Facebook, etc., depending on the apps you have on your phone. Select an app.
4. The selected app opens with the image attached. Now you can send the image from there.
Note: sending an image from your phone also saves the image in your photo library.
